## LOCAL AREA UNEMPLOYMENT STATISTICS PROGRAM

Vermont uses the State Time Series Analysis and Review System (STARS) to calculate its statewide monthly employment and unemployment estimates. STARS uses a signal plus noise model in these calculations. These estimates are done using input data from three sources: the Current Population Survey (CPS), Unemployment Insurance Claims counts and data from the Current Employment Statistics program. This CPS is conducted monthly by the U.S. Census, and gathers labor force data from Vermont residents.

Labor force statistics for each labor market area, county, and town are also estimated each month. These estimates are done using a Handbook method procedure. This form of estimation is a building-block approach that uses data from unemployment insurance claims, Current Employment Statistics (CES), and the U.S. Census.

Statewide estimates are available from January 1976 forward; sub state estimates are available from January 1990 forward.

The Local Area Unemployment Statistics Program (LAUS) is produced by the Vermont Department of Labor ([www.vtlni.info/laus.cfm](http://www.vtlni.info/laus.cfm)), Economic and Labor Market Information Division, in cooperation with the U.S. Bureau of Labor Statistics ([www.bls.gov/lau](http://www.bls.gov/lau)). Additional information can be found on our website: [www.vtlni.info](http://www.vtlni.info)

If you have questions about the data, please contact Folena De Geus at [Folena.DeGeus@vermont.gov](mailto:Folena.DeGeus@vermont.gov) or (802) 828-4285.
